DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of species I in the reply filed on 9/3/04 is acknowledged. The traversal is on the ground(s) that applicant asserts that claims 1,9 and 19-21 are generic and read on all inventions. This is found persuasive.
2. Claims 3-8 and 13-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9/3/04.
3. Claims 1,2,9-12 and 19-21 will be examined on the merits.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1,9-11 and 19-21 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Milliman et al (US 6,241,139).

In regard to claims 1,9,10 and 19-21, Milliman discloses the invention substantially as claimed including a surgical instrument 10, handle 22, shaft 14, which contains the firing, articulation and rotation mechanisms, anvil 20, a firing device, with

Art Unit: 3721

handle 24 which translates longitudinal motion to fire the stapler, cutting blade 280 and drive beam 266, which travels in channel 282, end effector 17, support plate (generally indicated by 254), flanking the firing mechanism and springingly engaged (i.e. bending back and for the like a leaf spring) and articulation mechanism 120, comprised of actuation lever 30, which causes rotation articulation of the end effector as it is moved (see Figs. 1,4,9,10, C6,L34-57, C9,L22-29, C12,L50-62 and C15,L21-55).

In regard to claim 11, Milliman discloses the invention substantially as claimed including cutting edge 280, staple cartridge 220, with staples 226 and cams 232 (see Fig.26 and C11,L63 – C12,L8)

Allowable Subject Matter

6. Claims 2 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnson, Hambling Melling, Jones Green and Geiste have been cited to show devices having similar structure.
